

# Remote Control Signal System

## Solar Powered

O'CONNOR

This efficient, solar powered, signal is designed for use at road, rail and path crossings where electrical power is not readily available. The signal is turned on and off by hand held remote control transmitters. Multiple signals may be activated by one transmitter. Units shipped assembled, ready for mounting on foundation. Each system includes 4 transmitters and 2 signals.

### Features

- No external wiring
- Solar powered with battery backup
- Energy efficient LED lights
- Independent signals operated by one remote control

*Transmitter*

*Remote Control Signal*

### Components per Signal

- magnetic mount handheld transmitters, (manual override on mast), 500 feet range, 4 transmitters for every 2 signals
- 50 watt solar power system with deep cycle battery, 30 hours continuous load without sun
- 2 – 12" flashing red LED lights
- 10' x 3.5" mast with 2.5' stub base (mast fits over stub, stub goes in ground or concrete)
- 24" or 30" inch "Stop on Red Signal" sign, "Stop" sign, or other
